MAINTENANCE & CARE

Thank you for Choosing Rokplank SPC Flooring. You have made a great investment in enhancing your living space. Please see below important info about how to maintain and care for your Floors

Immediately following installation During the first 48 hours after installation:

-Keep foot traffic to a minimum (recommended).
-Sweep the floor to remove loose dirt.
-Use only a PH Neutral Floor Cleaner - nothing with a floor polish or detergent in it.
-Do not use a vacuum with a rotating beater bar.
-Wait 24 hours before putting furniture on the floor

USE PROTECTIVE FLOOR MATS:

It is important to use a good quality entry mat to trap dirt, sand and other substances such as oil that would otherwise be tracked onto your floor. These mats will also help protect your flooring from premature wear. Mats are also suggested at heavy pivot locations, such as in front of your kitchen sink or stove. If mats are placed directly on top of the resilient floors, use mats without latex or rubber backings to avoid possible discoloration.

USE CHAIR AND APPLIANCE PADS TO PROTECT YOUR SPC FLOORING

Make sure furniture legs have large surface, non-staining floor protectors. Replace small, narrow metal or dome-shaped glides with smooth, flat guides that are in full contact with the floor. Heavy furniture or appliances that are not moved often should be equipped with flat, non-staining composition furniture casters or cups of appropriate size.

FOLLOW A SIMPLE MAINTENANCE PLAN:

The type and frequency of foot traffic on your SPC Floor will determine the frequency of maintenance needed. Regular attention to a simple maintenance program should include:
-Remove dirt and grit by sweeping or dust mopping daily.
-Wipe up spills as quickly as possible.
-Avoid exposure to direct sunlight for prolonged periods of time.

SPC Flooring is a great low maintenance product that is easy to clean. Follow these simple cleaning tips to help keep your flooring looking great:

Do

-Sweep your floors regularly to remove loose dirt and grit.
-Wipe up any spills as soon as possible.
-Clean your floors using a PH Neutral Floor Cleaner nothing with a floor polish or detergent in it.
-For spills, also use a PH Neutral Cleaner, wipe clean with a dry white cloth. No rinsing necessary!

Don't

-Use harsh chemicals.
-Use steam.
-Use a vacuum with a beater bar or brush.
